

Pulp Clamp

Pulp Clamps - There is a wide range of lift truck accessories available in order to make the devices more helpful. A snowplow accessory could be mounted to the front of the lift truck. A scoop bucket could be useful if the task requires transferring soil, sand, snow, or gravel. A double block handler allows the forklift operator to lift\carry two loads and after that pile them beside each other. Many of these accessories are really excellent for light to medium tasks.

Another forklift accessory is the package lift clamp, that could carry and transfer very heavy pallets. Additionally, pallet crane forks may be used to carry and move pallets with an overhead crane. A drum clamp accessory is useful for moving very heavy drums from place to place with out having to use a pallet. Forklift mounted hoppers enable materials to be transferred and dumped with out having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are even attachments available that could transform the lift truck right into a commercial mop or broom. These accessories are ideal for cleaning boat docks, warehouse flooring and parking areas. Forklift mounted platforms are available equipped with twin entry doors and could be attached so as to transport employees from one site to another. The mounted platform accessory is ideal for reaching areas which could be hard to access, especially when you have merchandise or supplies stored in out of the way locations or really up high.

It is a versatile alternative to put in forklift attachments which can instantly transform a lift truck right into a mobile crane unit. This particular equipment is extremely useful when it comes to moving loads which can be unsteady or difficult. This attachment can either be telescopic, mounted on the carriage itself, or be connected or lift truck mounted.
