

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

During their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could promptly and securely lift people in the air to accomplish upkeep and other construction functions.

Following their return from holiday, John set up a partnership with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into quite a few global marketplaces and continues to develop modern equipment to guarantee that clients are able to become safer and more efficient within their workplace.
