There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving forklift materials and materials handling equipment. This network enables Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line impressively includes 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck business in the North American marketplace, thanks to their stability in maintaining a high level of client service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division based in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the domestic forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a domestic equipment expansion venture. Sales of these goods were originally targeted to state-run firms, large scale organizations, and the military. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of significant expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added products for export. In 1993, the company had a global sales network and started exporting versions they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international markets.
